

Mitra SK Services in the Gulf Region

Excellence in Testing, Inspection & Certification

Mitra SK is a global leader in the Independent Testing, Inspection and Certification industry, having a significant footprint across the Middle East region. With a network of offices and state-of-the-art laboratories in Oman, UAE, Saudi Arabia, we provide accurate and timely TIC services, Environmental Monitoring and Port Operations throughout the region.

Promoting excellence in services and environmental responsibility through its comprehensive range of services, Mitra SK is known for quality TIC services in the Middle East, serving industries like

- **Steel**
- **Power**
- **Cement**
- **Metal Smelting**
- **Fertilizer**

Mitra SK is committed to uphold the highest standards of accuracy, reliability and sustainability to the industries and trade in the Gulf region.

We prioritize prompt customer service and effective communication, through a dedicated customer service team and advanced IT solutions, ensuring clients can easily access real-time service data and stay informed about their project status.

Oman

MSK Oman started operations in 2008 for providing TIC services for Iron ore, Chrome ore, Ferroalloys, Manganese ore, Limestone, Gypsum, Dolomite, Coke, Quartz, Urea, and Copper Concentrate. Our state-of-the-art laboratory, houses advanced equipment like LECO (CS 744), Spectrophotometer, for precision and accuracy of analysis.

MSK Oman also carries out round-the-clock Sampling and Supervision during container and vessel loading of cargo as well as sample collection and preparation using our proprietary online vessel tracking, monitoring, and reporting system to generate reports in real-time.

UAE

Mitra SK Inspection Gulf LLC (Mitra SK) was registered in 2011. Headquartered in Abu Dhabi, the Company has a branch office and testing laboratory in the port city of Ras Al Khaimah (RAK).

We conduct TIC of Limestone, Dolomite, Pyroxenite, Clinker, Gypsum, GBF Slag, Fertilizers, Coal, Coke and various other commodities.

Our Operations cover Mina Saqr Port in Ras Al Khaimah, Hamriyah port Sharjah, Fujairah Port in Fujairah, Jebel Ali Port in Dubai and Ruwais Port in Abu Dhabi.

Service Offerings

With Inspection facilities for out bound and inbound cargoes like cement clinker, flux materials, rock phosphate, fertilizers, automobile catalysts, non-ferrous materials, food and environmental parameter testing at every port and industrial hub, we serve varied needs of our clients.

TIC Services: We offer TIC services for Coal, Ferrous and Non-Ferrous Minerals and Alloys, Precious Metals, Fertilizers, Flux commodities, Clinker etc.

Port Services: We undertake sampling, drafting, and consultation, as well as pre-shipment inspection and analysis, supervision, or witnessing of barge and mother vessel activity at anchorage.

Along with Inspection facilities for out bound and inbound cargoes like Cement, Clinker, Flux commodities, Rock Phosphate, Fertilizers, Automobile Catalysts,

Mitra SK Services in the Gulf Region

Excellence in Testing, Inspection & Certification

Non-Ferrous commodities, Food and Environmental parameter testing at every port and industrial hub.

Lab Outsourcing: We set up dedicated laboratories on a contract basis, facilitating onsite laboratory management with specialists and trained chemists to ensure operational efficiency.

Operational Capabilities

We employ robust internal processes to manage our services efficiently. Our advanced data management systems ensure meticulous recording and reporting of all testing and inspection data. Clients benefit from our comprehensive IT Reporting, including online dashboards that provide real-time access to all service data and reports, enhancing transparency and efficiency.

We prioritize customer service and effective communication. Our client engagement strategies include a dedicated customer service team and advanced IT solutions, ensuring clients can easily access real-time service data and stay informed about their project status.

Our state-of-the-art laboratories are strategically located to serve our clients effectively. Equipped with cutting-edge technology, we ensure precise and reliable testing various parameters, from chemical analyses to environmental monitoring, meeting relevant industry standards.

Laboratory Outsourcing & Port Services: Using proprietary IT apps with advanced online dashboards for real-time monitoring and data access.

Use of advanced technology: Utilizing drones for precise stack analysis and industrial inspections

Training on best practices and latest national & international guidelines: Educating and training samplers and supervisors to maintain the highest standards of accuracy.

Quality Management

Adhering to all relevant regulations and safety protocols, we ensure compliance with national and international standards. Rigorous safety protocols are implemented in our laboratories for safety of our staff and to maintain a safe working environment.

We are committed to upholding the highest levels of compliance and operational integrity.

CSR Activities

Mitra SK executes and participates in various CSR activities in association with the government authorities and local social service organizations.
