### Brazil

Mitra SK Brazil (Pty) Ltd Mitra S.K. do Brasil Inspeção e Análises Ltda. was established in 2011 in Rio de Janeiro, Brazil to serve TIC of commodities such as iron ore, manganese ore, chrome ore, copper ore, coke, etc.

Mitra SK covers all ports and on-site customer operations in Brazil, from South to extreme North of Brazil. The team is well qualified and networked to carry out round-the-clock sampling and supervision during vessel/ container loading and unloading, sample collection from trains and trucks, and indicative stockpile analysis.

MSK Brazil also anchors all the Tic services for countries like Argentina, Chile, Colombia, Equador, Peru, Uruguay.

We are well networked for round-the-clock sampling and supervision during vessel/ container loading and sample collection from rakes and trucks.

Our online vessel tracking, monitoring and reporting systems generate real time reports during transit of materials.

### Laboratory

Mitra SK Chemical Laboratory is located in the city of Itaguaí, Rio de Janeiro.

The laboratory houses sophisticated equipment like ED XRF, Atomic Absorption Spectrophotometer, etc. It conducts a reliable, accurate, and prompt analysis of various minerals. The Laboratory is a licensed Laboratory by the Department of Navy for carrying out moisture & TML test.

The laboratory in Bacarena, North Brazil, near Vila De Conde port has a 25 personnel strong team.

### Services

Mitra SK covers all ports and on-site customer operations in Brazil, from South to extreme North of Brazil, along with TIC services in adjacent countries like Argentina, Chile, Colombia, Equador, Peru and Uruguay.

The team is well qualified and networked to carry out round-the-clock sampling and supervision during vessel/ container loading and unloading, sample collection from trains and trucks, and indicative stockpile analysis.

The Mitra SK team comprises of experienced personnel, technocrats and commodity experts. Regular internal proficiency tests are conducted at our facilities, to maintain a workforce that can deliver accurate and timely results consistently.

We provide round-the-clock sampling and supervision services for vessel/ container/ truck loading and unloading jobs. Our preparation facilities are located in Agadir and Casablanca.

Our proprietary integrated Information systems for online vessel tracking and real-time monitoring generate accurate customer reports 24x7. Uninterrupted photographic insights are provided to the customers through our IT systems.

### Operational Capabilities

We have state-of-the-art laboratories, strategically located to serve our clients effectively. Equipped with cutting-edge technology, we ensure precise and reliable testing across various parameters, from chemical analyses to environmental monitoring, meeting all industry standards.

# Mitra SK Services in South America

## Excellence in Testing, Inspection & Certification

Laboratory outsourcing and Port Services using proprietary IT apps with advanced online dashboards for real-time monitoring and data access.

**Use of advanced technology:** Utilizing drones for precise stack analysis and industrial inspections.

**Training on best practices and latest guidelines:** Educating samplers and supervisors to maintain the highest standards of accuracy.

### Quality Management

Safety and compliance are our top priority for quality assurance & consistency. We conduct daily instrument and equipment checklists, calibration and maintenance controls to ensure the highest standards are met.

Our laboratories are accredited to the highest standards.
